**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 18-27, drawn to a method of preventing aging of skin, classified in class 424, subclass 401.
- II. Claims 28-37, drawn to a method of preventing greasy skin, classified in class 510, subclass 130.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the method of preventing skin aging and greasy skin are not disclosed as capable of use together, and they have different functions and effects.

These inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter. The search required for Group I is not required for Groups II. The claims as presented would impose serious burden on the examiner to conduct meaningful search and examination. Restriction for examination purposes as indicated is thus proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
